

Rspored praktične nastave za strane studente

Predmet: epidemiologija

| <b>Tematska jedinica</b>                              | <b>Broj časova</b> | <b>Opterećenje<br/>(broj grupa)</b> | <b>Ukupan broj<br/>časova</b> |
|-------------------------------------------------------|--------------------|-------------------------------------|-------------------------------|
| 1. Health disorder frequency indicators               | 1                  | 2                                   | 2                             |
| 2. Standardization.                                   | 1                  | 2                                   | 2                             |
| 3. Causality in epidemiology and the concept of risk. | 1                  | 2                                   | 2                             |
| 4. Natural flow of disease.                           | 1                  | 2                                   | 2                             |
| 5. Disposition and collective immunity                | 1                  | 2                                   | 2                             |
| 6. John Snow and cholera (descriptive method).        | 2                  | 2                                   | 4                             |
| 7. Smoking and lung cancer (case study and control).  | 1                  | 2                                   | 2                             |
| 8. Smoking and lung cancer (cohort study).            | 2                  | 2                                   | 4                             |
| 9. Field experiment.                                  | 1                  | 2                                   | 2                             |
| 10. Immunization (active)                             | 2                  | 4                                   | 8                             |
| 11. Immunization (passive).                           | 1                  | 4                                   | 4                             |
|                                                       |                    |                                     | 34                            |
